Environmental Policy Statement

Waveney Precision Ltd is committed to a strategy to reduce the effects of its activities on the environment in line with the EU Waste Framework Directive, and to recycle waste by recycling and to stop further waste going into landfill.

The key points of this strategy to achieve this are:

- *To minimise waste by evaluating operations and ensuring they are as efficient as possible.
- *To actively promote and improve recycling internally, by re-using packaging internally wherever possible. From Sept 2024 Waveney Precision changed bin suppliers to enable us to have a bin for waste and then a separate bin for recycling to ensure that we recycle as much as possible.
- * To strive to comply with all relevant environmental legislation. We strive to comply with WEEE and to ensure our electrical items are disposed of correctly (through the use of Citrus). All waste oil etc is disposed of by C & L Waste and in line with legislation.
- *To try and implement energy saving measures wherever possible.
- *To ensure all staff are aware of environmental issues.

All staff are accountable for achieving these objectives and the policy will be reviewed yearly to ensure these objectives are being met and continuous improvement is being made.

Signed:

Alan Smith
